TECHNICAL SPECIFICATIONS

This new metal post for vineyards is presented in a form entirely new.

This post unlike previous posts that had the slot or internal or external slot, comes with recessed slot. This new conception of Metal Post was designed to find a proper proportion and try to standardize as much as possible the production lines by increasing the performance of the metal pile and fully satisfy customer needs.

With this form of fin we have tried to create a greater resistance to the action of the beaters.

The slot has been designed to avoid accidental release of the wire

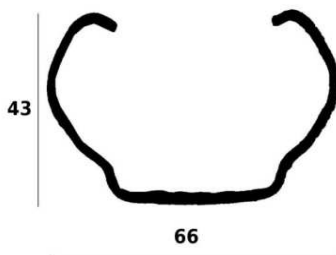

The new line of metal pile presents the edges of the pole bent internally to strengthen the pole and ensure better development posing post despite the buttonhole has been completely encased, it is secured the sliding of the wire ease in moving the wire containment of the shoots

The post is made of metal sheet certified according to UNI / EN / ISO.

It is available in finishes available:

- Pre-galvanized steel
- Galvanized steel HOT
- COR-TEN

The post galvanized is certified according to UNI EN ISO 1461/2009 (guaranteed minimum thickness 70 microns)
