There are of different types and materials.

From a simple bracket in metal with fixing holes in the pole and holes for the placement of the growing vegetation to new and innovative accessories with other functional and improvement characteristics at work.

The bracket can be mounted in few seconds even on existing systems, since adaptable to any kind of pole for vineyard and to any kind of wire. Thanks to it, it can be avoided to fasten the vine-shoots to the parallel wires. Its unique size and shape allows the vine-hoots to be inserted between the wires thus avoiding the old method of fastening. In addition, the wire spacer brackets, does not disturb in any way the work of mechanical harvesters.

These products allow to have the pair of wires well-spaced in a permanent way and are used in all those vineyards where the manual operations are irreplaceable (vineyards in disadvantaged areas and particularly fine vineyards).

Available Sizes:

Size Bracket	Weight
cm 16	0,05304 Kg.
