Posts are a new concept designed to guarantee maximum performance in vineyards high mechanization. The particular profile in two sections combined with the provision of longitudinal ribs, guarantees maximum stability in the soil, and the maximum mechanical resistance to twisting and bending. The slots pass the wire are shaped in such a way as to allow easy insertion (and possible disconnection) of the wire, ensuring anyway an optimal sliding in any condition. In addition, the flap stand bar built inside of the ribs side of the pole, does not protrude as in traditional poles and therefore does not damage the batsmen of the grape and is protected from impacts of machines.

finishes available

It is available in:

- HOT galvanized steel
- COR-TEN
- Galvanized steel SENDZIMIR
- Galvanized steel cover + POLYESTER

Section of the post

- 62x40 for the end posts
- 54x40 for the row posts

PRODUCTS AVAILABLE:
