This pole is the pole ideal for vineyard mechanization high. The shape of the profile and the longitudinal ribs, combined with the quality and quantity (development of 135 mm) of the steel used, give our pole mechanical strength and flexibility, as well as a remarkable stability in the ground.

The pole is equipped with slots passes wire internal type, with the shape that allows the easy insertion of the wire while avoiding the accidental release of the same.

The slots pass wire internal type and shape of the profile without sharp edges facilitate the mechanical operations during both pre-pruning, that harvest (are not damaged beaters of grape)

finishes available

It is available in:

HOT galvanized steel
